

Special Issue

Operations and Technology Management in Sustainable Manufacturing

Message from the Guest Editors

A growing number of manufacturers are targeting sustainability as an essential objective in their strategy and operations. Improved operational efficiency, customer satisfaction, compliance with regulatory constraints, and brand reputation are among the main drivers of sustainable manufacturing. Achieving sustainability in manufacturing involves addressing various economic and socio-environmental concerns in a coordinated, integrated, and formal manner, among other requirements.

The current special issue aims at introducing the reader to the implications that novel operations, manufacturing, and digital technologies and the underlying management practices might offer for sustainable manufacturing. The present special issue also aims to discuss the most relevant manufacturing digitalization and sustainability trends from the industrial point of view and highlight the main challenges that contemporary manufacturers might face while pursuing sustainable products, operations, and processes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
