

Special Issue

Optimised Technologies for Improving Building Energy Efficiency

Message from the Guest Editors

Recent reports of the International Energy Agency (IEA) reveal that buildings are the focal point of policymakers and researchers.

To further spread the technologies and methods related to building energy efficiency towards L/ZCBs, this Special Issue, entitled “Optimised Technologies for Improving Building Energy Efficiency”, has been proposed for the international journal *Sustainability*, which is an SSCI and SCIE journal. This Special Issue mainly including but not limited to active and passive house designs towards L/ZCBs, nearly zero-energy buildings (NZEBS) and plus energy buildings (PEBs), building-integrated photovoltaic/thermal collectors (BIPV/T), thermal superinsulation technologies for roofs and facades, novel solar-assisted heat pumps for buildings, Trombe walls, seasonal energy storage systems, waste heat recovery technologies, cost-effective daylighting, renewable-driven heating, cooling and ventilation, and so on. Papers nominated for this Special Issue are subject to a meticulous peer-review process with the target of rapid and efficient dissemination of research findings, advancements, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
