

Special Issue

Optimising E-health System for Sustainable Healthcare

Message from the Guest Editor

Nowadays, e-health is a global tool accessible to the majority of people. The application of information and communication technologies in health systems represents benefits in terms of innovation in the social and health field and in the economy of any country. The application of technology to health offers the possibility of integrating processes, improving efficiency in the use of time and resources, and thereby reducing costs, leading to an increase in the productivity of healthcare systems.

We welcome both original research and review articles in the field of healthcare with sustainable purposes by using the most cutting-edge technologies. We search for practical applications for solving narrowed problem scopes and theoretical procedural approaches to solve a wide range of issues. For this Special Issue, we also welcome solutions in the fields of efficient algorithms, communication among different technologies and software applications, artificial intelligence applications, cloud/edge computing, and, in general, all the technologies aimed at improving the sustainability of healthcare systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
