

# Special Issue

## Out of the Lab Employment of Neurophysiological Measures and Sustainability

### Message from the Guest Editor

The aim of this special issue is to outline state-of-the art regarding applications of neuroscience-based techniques, especially in real settings, highlighting in particular current issues and future trends. They are in particular encouraged those studies in which it is clearly demonstrated how such neuroscience-based techniques could be used to enhance human safety and health. **Keywords**

- neurophysiological measures
- machine learning
- signal processing
- biosignals
- safety
- health

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
