

Special Issue

Strategic Management, Innovation Dynamics and Economic Sustainability

Message from the Guest Editor

The pursuit of economic sustainability has become imperative in today's volatile and uncertain global landscape. In an increasingly volatile global economy, firms face the challenge of aligning strategic decisions and financial policies with innovation-led growth and long-term value creation. The purpose of this Special Issue is to advance both scholarly and practical understanding of how organizations can achieve long-term sustainability by integrating strategic management with innovation dynamics in an era characterized by financial pressure and entrepreneurial transformation. By exploring the interplay between strategic management, innovation dynamics, and corporate finance, this Special Issue seeks to provide insights into how firms and policymakers can navigate volatility while fostering sustainable economic growth and resilience. This Special Issue welcomes theoretical, empirical and policy oriented contributions that address the following:

- Corporate finance and sustainability;
- ESG-driven investment strategies;
- Entrepreneurship and innovation dynamics;
- Integrative perspectives that connect finance, risk, and entrepreneurship in advancing sustainable business models.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
