

## Special Issue

# Challenges Detection and Mitigation for Sustainable Rural Tourism

### Message from the Guest Editors

Rural tourism can be defined as a type of activities that a visitor can enjoy featuring a wide range of products mostly linked to nature-based activities. Recently, up-to-date scientific data and equipment, such as remote sensing techniques, GIS tools, in situ measurements, engineering models, etc., played a significant role in the field of rural tourism challenges detection and mitigation. This Special Issue encourages scientists that are interested in using new technologies to balance rural tourism needs, the economic situation, and achieving good environmental biodiversity to publish articles. In addition, the scientific articles should lead to a developmental strategy to enable a rural community to grow, achieve sustainable rural tourism development, and preserve the natural environment.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
