# **Special Issue**

# Sustainable Development of Hydrogeology

### Message from the Guest Editors

Hydrogeology, due to its area of interest, occupies a special place in science and industry, and its development, especially in practical aspects for increasing the quality of our lives, deserves more attention and a better demonstration to be implanted into the public consciousness. The purpose of this Special Issue is to show the most interesting examples of recent developments in hydrogeology with exclusive emphasis on their practical applications and/or industrial implementation potential. We intend to collect a series of high-quality papers/reports/reviews presenting the case studies of successful applications of novel research methods, innovative technologies, or new approaches to solve current real-life environmental problems involving groundwater systems or to meet burning societal or industrial needs for increasing the quality of life. We are looking for research outputs from different parts of the world that are cross-cutting and interdisciplinary and which clearly demonstrate a practical application supported by the presentation and interpretation of credible hydrogeological data.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
