

Special Issue

Technological Innovation and Green Industrial Transformation

Message from the Guest Editors

More than ever, in the current economic crisis, eco-innovation has become one of the effective ways to support green growth. New challenges related to sustainable technological changes should be identified and analyzed. These challenges can be important lessons and sources for research and development, from academics and researchers to policymakers, experts and professionals. In this context, green innovation is one of the key tasks of developing greener and low-carbon circular economic systems. Innovation and related creative processes also lead to new valuable ideas. Thus, technological innovation advancements can have a substantial positive impact on the environment. The resulting green innovations can help industry to achieve balance between economic and environmental performance and high-quality green development. Therefore, technological innovation is a continuous source for sustainable development and the transformation of industries and the worldwide economy. This Special Issue aims to bring together various research achievements and results on technological innovation and industrial transformation processes that foster sustainable development under circular economy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
