

Special Issue

Regenerative Circular Economy in Business Models and Strategies

Message from the Guest Editors

The established linear production and consumption economic system has been recently challenged by the circular economy (CE) paradigm. Circular economy (CE) is defined as an economy designed to “regenerate itself”: biological materials are reinserted into the biosphere, and technical materials are designed to be reused with a minimum loss in quality. Circular economy can be seen as a framework for systems-level solutions that address issues including, among others, pollution, waste generation, biodiversity loss, and climate change.

In this context, the aim of the present Special Issue is to better understand how businesses can foster the transition towards a more regenerative circular economy. Research areas may include (but are not limited to) the following:

- Regenerative circular economy approaches;
- Circular business model;
- Circular strategies adoption;
- Innovation for fostering circular economy adoption in business;
- Circular economy and climate change mitigation/adaptation in business strategies;
- Indicators, tools and instruments to foster the adoption of circular economy in business.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
