

## Special Issue

# Promotion and Optimization toward Sustainable Urban Logistics Systems

### Message from the Guest Editors

The logistics resource configuration provides a better understanding of intelligent logistics, multimodal transport, resource-sharing modes, coordinated configuration of logistics resources, etc. In addition, collaboration among logistics enterprises is a promising approach to increase enterprise operational efficiency by sharing the limited logistics resources under different situations and promotes the sustainable development of urban logistics systems in the long term. Several issues have been raised on the use of traditional models and algorithms. Potential topics include but are not limited to the following:

- Logistics schemes and performance evaluation;
- Resource-sharing modes and strategies;
- Collaborative mechanisms (i.e., how to facilitate collaboration among transport entities) in logistics network operations;
- Collaborative logistics system ;
- Sustainable logistics network modeling;
- Application of intelligent algorithms for solving logistics network modeling;
- Multiperiod resource configuration in the time-space logistics network;
- Vehicle routing and scheduling with dynamic customer demands;
- Application of emerging technologies in logistics network.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
