# Sustainability Performance of Green Ports: Assessment and Optimization

# Message from the Guest Editor

We are pleased to launch of a new Special Issue focusing on the sustainability performance of green ports.

Green ports are a critical component of the global transportation network, and their sustainability effectiveness is of increasing importance in the face of growing environmental concerns. This publication will focus on the evaluation and enhancement of ecofriendly practices in port operations, taking into account environmental, social, and economic factors.

Based on this premise, the goal of the Special Issue is to offer insights into best practices, case studies, and strategies for optimizing the sustainability performance in ports, seeking to contribute to a more environmentally responsible and economically viable global trade system.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
