Special Issue

Sustainable Development: Integrating Economy, Energy and Environment

Message from the Guest Editors

Sustainable development is a realistic choice for everyone, emphasizing the balanced growth of the economy, energy, and environment. It calls for a shift from the traditional "pollution first, treatment later" model to a green, low-carbon, circular development path. This includes promoting renewable energy, energy-saving technologies, and green consumption to achieve harmony among these three pillars. Energy is crucial for economic growth and environmental protection. The reliance on fossil fuels leads to pollution and climate change, making the transition to clean energy essential. Developing sources like solar and wind power can reduce carbon emissions and ensure energy security, creating a cleaner future for generations to come. Achieving sustainable development requires collaboration between the government, businesses, and the public. Governments must create policies that promote sustainability, while businesses should adopt responsible practices. The public can contribute by raising environmental awareness and leading green lifestyles. Together, we can build a prosperous economy, secure energy, and a beautiful environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
