

Special Issue

Creative and Sustainable Initiatives to Combat Food Waste at the Consumption Stage

Message from the Guest Editor

This Special Issue on combatting food waste through responsible consumption aims to gather the latest results of the innovative research in this field. In particular, it seeks to investigate the complex relationship between consumer behavior and the reduction of food waste, highlighting the role of consumers in promoting more responsible consumption patterns. Studies on innovative and effective educational and communication initiatives, technological innovations, policy interventions and collaborative efforts of members of the food supply chain are very welcome. Research that analyzes the reduction of food waste at the consumption stage, through the application of artificial intelligence methodologies, challenges and games, is also encouraged. With its multidisciplinary perspective, this Special Issue aims to offer practical knowledge to the policymakers and researchers interested in creating solutions to the problem of food waste in the form of strategies that make consumers change their perception of the value of food, so that more responsible behavior is stimulated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
