

## Special Issue

# Sustainability and Performance Management System

### Message from the Guest Editor

The objective of this Special Issue is to explore proposals and applications in both the service and manufacturing areas, able to reach sustainable development goals and simultaneously to increase organizational performance. This Special Issue aims at providing an overview of the most recent developments in the diverse fields of sustainability by examining different perspectives. The focus is on the effective management of tangible and intangible assets (such as processes, infrastructures, and human capital). According to the above, the range of topics available for publication in this Special Issue is very wide, including but not limited to: (1) Innovative sustainable management systems; (2) Innovative performance management systems; (3) Sustainable applications for services and manufacturing; (4) Organization efficiency models; (5) Service and manufacturing applications with sustainability; (6) Management models based on Key Performance Indicators; (7) Environmental strategies for services and manufacturing; (8) Sustainable measure models; (9) Performance measure models; (10) Combined strategies for Sustainability and organization performance.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
