# Supply Chain Performance Measurement in Industry 4.0

### Message from the Guest Editors

Customer requirements are changing more often than expected because of social media. Due to changing demand, industries are finding it difficult to balance the demand and supply. The success of an industry depends upon its responsive supply chain management (SCM).

SCM involves decision-making during five distinct phases, i.e., supply chain planning, production planning, inventory planning, capacity planning, and distribution planning. The industry must strive to accomplish various phases throughout the supply chain to make it more capable of Industry 4.0. Thus, the evaluation of the supply chain becomes an integral part of performance measurement. However, the performance measurement in each phase is challenging and requires research. Recent advancements in supply chain performance measurement have played a significant role in managing SCM. Thus, industries need state-of-the-art supply chain practices to help them to accomplish the required sustainability in SC practices.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
