

Special Issue

Planning and Design Interventions for Improving the Well-Being of Vulnerable Groups

Message from the Guest Editors

This Special Issue of *Sustainability* welcomes theoretical and empirical contributions from a variety of disciplines that provide deeper insights on the following: a) how urban planning and design interventions impact the wellbeing of vulnerable groups or communities, and b) what vulnerable groups' experiences and perceptions are of transformations in urban environments. The main aim is to bridge approaches and methodologies from different disciplines (e.g., urban planning and design, environmental psychology, and behavioral and social sciences) to build an interdisciplinary capacity to overcome the challenges of creating urban environments that support health and wellbeing of vulnerable groups. Empirical analyses of the urban transformation projects that enhance the wellbeing of vulnerable groups are especially welcome. The geographical scope of the Special Issue is global, and contributions regarding case studies and design interventions from both developed and developing countries will be equally relevant and welcome.

Guest Editors

Dr. Sina Shahab

Dr. Marica Cassarino

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
