

Special Issue

Population Dynamics in the Changing Climate Systems

Message from the Guest Editors

For this Special Issue, we encourage papers that focus on either (i) population/demographic impacts on environment/energy or (ii) the consequences of environmental changes on population. The level of analysis could be local, national, regional, or global, and methods employed could range from case-study, comparative analysis, or statistical modeling to projections. Submissions employing multidisciplinary approaches are particularly encouraged. The key criteria are that the paper have demographic component(s)/implication(s). On the other hand, potential, novel, unsettled topics include:

- Changing household consumption patterns;
- Rural to urban migration;
- Energy poverty/access;
- Energy consumption and environmental dynamics in emerging economies;
- Demographic scenarios on the changing characteristics and vulnerability of population to climate change;
- Role of cities in the energy transformation (i.e., increased renewable energy).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
