

Special Issue

Implications of the COVID-19 Pandemic for Future Urban and Spatial Planning

Message from the Guest Editors

The recent pandemic that has been affecting the entire global community has already altered several dimensions of our urban life. Even if spatial planning has not been considered among the most critical spheres during the COVID-19 emergency, urban planners should become key players for guiding the future of our cities, by redefining old practices and assumptions, capitalizing innovative approaches developed during the emergency by stabilizing them in the long term, and proposing innovative methods and tools.

This Special Issue intends to investigate several dimensions of urban and spatial planning and policies that could be significantly affected by a concrete change following the outbreak. Particular attention should be dedicated to urban mobility and how to make this COVID-19 recovery phase a game-changer for planning, implementing, and financing more sustainable urban transport systems and solutions, instead of returning to and amplifying the old habits of using individual, motorized transport solutions that pollute and congest urban spaces.

- post-COVID-19 planning
- urban densification
- urban–rural linkages
- public spaces and services
- digitalization

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
