Sustainability on Production and Industrial Management

Message from the Collection Editor

Sustainable production depends on the management of waste minimization, energy consumption, resources saving (e.g., water, energy, etc.), the reliability of the machines used (in regard to the high environmental impact of maintenance, repairs, and replacement), and the increase of human wellbeing in working environments. To develop more sustainable societies, industries need to better understand how to respond to environmental, economic, and social challenges, and to transform industrial behavior. This Special Issue aims to show recent research on the concepts, methods, tools, and applications for sustainable production in order to advance and promote the development of modern and intelligent production systems and industrial management. I hope that by developing the field tools and knowledge we can help to accelerate the transition towards a sustainable industrial system. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
