

## Special Issue

# Sustainability and Optimization in Production and Service Systems

### Message from the Guest Editors

During the most recent decade, facing the rapid degradation of environmental pollution and climate change, many nations have devoted themselves to boosting the environmental sustainability of production and service systems in their supply chains to establish a sustainable ecological environment. In order to respond to these requirements, companies must establish low-carbon and environmentally friendly production and service systems, and should consider the whole product/service life cycle, from product and service design to component manufacturing, finished product assembly and delivery, maintenance and recycling and reuse, to review the potential improvement opportunities.

Therefore, the aim of this Special Issue is to disseminate concrete analytical approaches and solutions to assist companies in finding the hot spots for the improvement of production and service systems, to formulate improvement alternatives and to create optimal decision-making models to achieve the ultimate goal of creating sustainable production and service systems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
