

## Special Issue

# Promoting and Sustaining Urban Health: Challenges and Responses

### Message from the Guest Editor

This Special Issue addresses global concerns about our habitat and our health in an urbanizing world of constant change. Cities and urban development are complex, dynamic and systemic phenomena, the positive and negative consequences of which are addressed in the United Nations 2030 Agenda for Sustainable Development. The ways in which components of urban ecosystems influence health are a shared concern of researchers and practitioners in a variety of disciplines and professions within and beyond the health sciences and medical fields. Narrow cause/effect analyses that ignore multiple variables of urban environments are unlikely to achieve sustainable improvements for population health. For this Special Issue, original research articles and innovative project results related to the ongoing implementation of the United Nations 2030 Agenda for Sustainable Development, and particularly the interconnections between SDG3 and SDG11, are welcome.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
