Special Issue

Emerging Challenges to Protected Areas Management

Message from the Guest Editors

Protected areas (PAs) are considered a key area-based measure for conserving biological diversity and ensuring both the representation and persistence of the world's biomes. Although the number and spatial extent of PAs have increased since the 1970s, PAs and PA networks have faced both ongoing and emerging challenges in recent years. PA management teams are increasingly confronted with a myriad of challenges, including, inter alia:

- SARS-CoV-2 and other zoonotic diseases:
- Climate change adaptation;
- Spread of invasive species;
- Habitat fragmentation due to infrastructure development:
- Over-exploitation of resources both within and adjacent to PAs;
- Shrinking national budgets allocated for PAs;
- Lack of resources in terms of staff and expertise;
- Protected area Downgrading, Downsizing, and Degazettement (PADDD);
- Stakeholder and governance conflicts;
- Corruption (endogenous and exogenous);
- Armed conflict;
- Conflicting management objectives;
- Harmonising development and conservation;
- Managing tourism:
- Adaptive management and co-management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
