

## Special Issue

# Working during the COVID-19 Global Pandemic

### Message from the Guest Editors

The world health organization declared coronavirus disease 2019 a pandemic on March 11th. During the spread of coronavirus, it became necessary to understand the protective factors, risk factors, stressors, and psychological and health conditions, associated with an unprecedented emergency, especially on those workers on duty during the lockdown.

This research topic intends to understand which variables are considered most important to investigate, how research on the phenomenon is implemented, and the differences in studies between different countries, on the emergency COVID-19, with the aim of assessing how researchers are acting to study psycho-social phenomena related to the coronavirus emergency, effective preventive measures and public health management response and containment interventions.

Since many researchers around the world are using their efforts to contribute to the study of the phenomenon, this research topic aims to highlight interdisciplinary research approaches deployed during the COVID-19 epidemic from across the world.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
