

Special Issue

Sustainable Investment: Consequences for Psychological Well-Being

Message from the Guest Editors

The Special Issue is dedicated to sustainable investment (SI), generally referring to the environmental, social, and governance (ESG) factors that are integrated into the financial investment process. Submissions solicited for the Special Issue should discuss or empirically demonstrate conditions facilitating the successful accumulation of this knowledge, whether by means of interacting with companies; choosing strategies for investing in company stocks; or by other means such as altering investment practices, organizational norms, and interpretations of the legal aspects of the fiduciary role to become aligned with beneficiaries' visions of a good life. An important task for all submissions to the Special Issue is hence to provide an unequivocal definition of SI. The Special Issue should be an opportunity for those engaged in SI research to increase other sustainability researchers' knowledge of SI, thereby possibly paving the way for more interdisciplinary collaboration in the future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
