Advances in Psychophysiological Evaluation: Towards a Better Understanding of the Stress Response and Sustainable Lifestyle

Message from the Guest Editor

The stress response is an adaptive response that has been modulated during the development of the human species, making it very efficient when dealing with anecdotal events that endanger the physical integrity or life of the subject. When this stress response is maintained over time, which, at the acute level, is a highly adaptive response, it begins to become the basis of a multitude of pathologies at the physiological and psychological levels, thus compromising a sustainable lifestyle. Thus, state-of-the-art psychophysiological methods and instruments of evaluations addressing wellbeing are encouraged for this Special Issue.

However, the main objective of this Special Issue is to share the knowledge of researchers from different areas offering multidisciplinary research connected to the psychophysiology of stress and its impact on either physical or mental health.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
