

## Special Issue

# Psychosocial Impact of COVID-19 and Sustainable Development

### Message from the Guest Editor

The COVID-19 pandemic, a public health crisis which the world has been experiencing in full force since 2020, has caused numerous changes in everyone's daily life and has had several significant health, economic, financial, social, cultural, environmental, political, and educational implications. This Special Issue aims to collect up-to-date research articles that explore and examine the psychosocial impacts of COVID-19. There is a need to collect and systematize knowledge about the psychosocial impacts of COVID-19 on different populations, such as children, adolescents, adults, older people, and also specific populations, such as workers and athletes. This Special Issue entitled "Psychosocial Impacts of COVID-19" will be a great opportunity to share high-impact manuscripts with your peers. Moreover, this Special Issue will facilitate the design and implementation of actions aimed at the prevention and promotion of adequate psychosocial development and may help to build a better post-COVID-19 world, taking into account the benefits of sustainable strategies

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
