Public Transport Accessibility and Sustainability

Message from the Guest Editors

Today's methods of PT accessibility assessment stress explicit estimations of the travel time, the last mile problem and LOS for the PT versus other modes. A wide spectrum of measures from aggregated to individual-/activity-based have already been proposed and more are in development. Leave No One Behind, the keynote of Sustainable Development Goals, extends the goal of the PT from providing satisfactory home–job commuting to much greater variety of services for all population groups, including the elderly, children and youth, tourists and people with disabilities. All this should be addressed in accessibility studies. We should enhance accessibility measures and the software, explicitly consider various population groups and, also, go beyond the boundaries of large cities and metropolitan areas and assess public transport accessibility in small towns and villages. In cities, we speak about minutes in travel and idle time, in rural territories it may be hours, with serious economic and social consequences.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
