Special Issue

Sustainable Management, Digital Technologies, and Data Analytics for Green Environmental Management

Message from the Guest Editor

Digital technologies (more specifically, artificial intelligence) have gained rapid traction for their use in multiple business applications. This Special Issue focuses on the utilization of digital technologies by businesses and management for the purpose of sustainability (environmental management, sustainability reporting, and business accountability, as well as social and environmental legal compliance and stakeholder expectations). It is critical to address the opportunities and challenges associated with the utilization of digital technologies for sustainable management. This Special Issue aims to cover multiple angles and applications (current and potential) of digital technologies for sustainable management. As such, this Special Issue fits in the scope of the journal, being the exploration of environmental and social sustainability and socio-economic approaches to sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada
