### Message from the Guest Editor

Sustainability, in a broader sense, can be achieved by decoupling economic and social activities from climate change, which generates greenhouse gas emissions. The limited nature of financial resources stresses the importance of coherent public policies in determining the adequate balance of actions. Many national economies struggle with development issues, chronic public deficits, and other structural deficiencies, such as weak institutional frameworks. In this complex context, this Special Issue will select theoretical and empirical original studies approaching topics such as, but not limited to, the following:

- the impact of energy transition on social and economic sustainability;
- energy diversification in the context of just transition;
- energy transition and social justice;
- technological innovation for energy transition;
- internalizing externalities and sustainable development;
- policy instruments for environmental sustainability;
- renewable energy environmental costs and benefits;
- green growth and sustainable development;
- green urban development.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
