

Special Issue

Agricultural Economic Transformation and Sustainable Development

Message from the Guest Editors

The global agricultural economy is changing as both the dynamics of world trade and international instabilities and crises directly and catalytically affect it. Although these difficulties create a global gloomy environment, the agricultural economy is also changing in a positive way as national and supranational formations, so as to address the dynamics of events. In this context, this Special Issue aims to highlight both the problems of changes, but also the solutions for achieving sustainable development in the rural area, with a focus on the rural economy, as well as its various aspects and differentiations.

The transformation of the agricultural economy is fully linked with integrated sustainable development and touches on aspects related to agro-food strategies, bioeconomy, precision agriculture, organic farming, and the marketing of agricultural products, among other things. In this Special Issue, we also aim to cover all aspects under the concept of agricultural economy transformation and we do not follow the existing literature that usually studies the topics separately.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
