

## Special Issue

# Nature-Based Solutions for Landscape Sustainability Challenges

### Message from the Guest Editors

This Special Issue aims to explore the role of nature-based solutions (NbSs) in addressing the pressing challenges of landscape sustainability in urban or rural areas, with a particular focus on ecosystem restoration, green industry, climate adaptation, and biodiversity conservation. The Special Issue will examine how NbSs, such as reforestation, wetland restoration, and urban green infrastructure, can be applied to mitigate environmental degradation, enhance resilience, and promote sustainable land management practices. The scope of this Special Issue includes both theoretical advancements and practical applications across diverse landscapes, from urban environments to rural and coastal areas, the purpose being to foster a deeper understanding of how NbSs can be integrated into landscape planning and policy-making processes, and to highlight successful case studies and innovative approaches.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
