Special Issue

Applications of Management Information Systems in Sustainability

Message from the Guest Editor

Management Information Systems (MIS) play a vital role in promoting and enhancing sustainability efforts within organisations and across the globe. By leveraging technology and data, MIS enables the gathering, analysis, and dissemination of information related to sustainability that leads to the best practices and policies. We encourage submissions of papers that address themes including, but not limited to, the following:

- Analysis of environmental data such as energy consumption, waste generation, water usage, carbon emission, etc.
- Development of real-time performance tracking and reporting to assess sustainability initiatives, identify trends, and facilitate evidence-based decision making.
- Advanced sustainability practices in the supply chain.
- Resource optimisation for sustainability, such as energy, water, and natural resources.
- Strategy development leading to reduced environmental impact.
- Development of environmental impact assessments.
- Development of transparency and accountability in sustainability practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
