

## Special Issue

# Corporate Social Performance: Pathways to Sustainable Growth

### Message from the Guest Editors

This Special Issue focuses on the unique attributes of corporate life, particularly the recent changes in corporate structures due to the privatization of communal and corporate organizations. The transformations in Kibbutzim and other cooperative communities present an opportunity to explore their renovation processes. These changes have led to new organizational forms, including hybrids that provide pathways to sustainability and growth. The issue will examine how cooperative businesses thrive in capitalistic environments and identify mechanisms that help these enterprises adapt and remain sustainable. We aim to explore practices that offer insights into coping with competitive markets, emphasizing sustainability in both global and local contexts. Submissions may address cultural, structural, economic, geographical, and political aspects of these renewed communities and organizations, including the livelihoods within them. Our goal is to define and quantify sustainability while developing tools, applications, policies, and legal frameworks for effective measurement and monitoring.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
