

## Special Issue

# Sustainability in Animal-Origin Products

### Message from the Guest Editors

In the context of the challenges facing humanity and the planet, it is necessary to strike a balance between achieving food security and producing food in a sustainable, responsible and environmentally friendly manner in line with the SDGs and Agenda 2030. From this starting point, the objective of this Special Issue is the publication of papers that focus on maintaining food safety and quality while considering sustainable food production, specifically in meat production systems due to their impact on carbon footprint and the climate crisis. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The production of food of animal origin in an environmentally sustainable way, with special emphasis on products derived from ruminants.
- Food management strategies to improve quality control and guarantee the safety of foods from sustainable systems during.
- Citizen literacy in sustainable meat production systems.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
