

Special Issue

Innovative Approaches to Sustainable Production Systems and Supply Chain Management

Message from the Guest Editors

This Special Issue seeks to explore and present the latest research and advancements in sustainable production and supply chain practices; The main aim being to offer a thorough understanding of how innovative strategies, technologies, and methodologies can be harnessed to enhance sustainability within production and supply chain systems. By addressing the environmental, social, and economic facets of sustainability, this Special Issue aspires to foster the development of more resilient and responsible production and supply chain networks. Suggested Themes:

- Sustainable Production Technologies: Innovations in manufacturing processes that reduce environmental impact;
- Green Supply Chain Management: Strategies for sustainable sourcing, logistics, and waste management;
- Circular Economy and Resource Efficiency: Implementing circular economy principles in production and supply chains;
- Technological Innovations for Sustainability: The roles of IoT, AI, and blockchain in enhancing sustainability;
- Social Sustainability in Supply Chains: Ensuring fair labor practices, community engagement, and social responsibility.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
