

## Special Issue

# Application of Cyber Security in Sustainable System

### Message from the Guest Editors

This Special Issue will focus on cutting-edge research from both academia and industry, and solicits original research papers with a particular emphasis on the application of cyber security in sustainable systems. Potential topics include, but are not limited to, the following:

Reshaping a sustainable view of cyber security;

Comparison of cyber security models of sustainable systems;

Application of emerging technologies in improving system resilience;

Dealing with data quality challenges in the process of sustainable operation;

Security, privacy, and trust issues in sustainable systems;

The impact of the introduction of AI on the cyber security of sustainable systems;

A framework for sustainable systems management considering cyber security;

Construction of a sustainable cyber security ecosystem;

Problems encountered in the rapid digital transformation of various fields

Challenges in the sustainable operation of new ventures;

Cyber security systems considering multi-level coordination and sustainability.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
