

Special Issue

Sustainable Development Information Technologies for Business Strategies and Public Safety

Message from the Guest Editors

Sustainability reporting focuses on the impact of companies' business strategies on the environment, society, and governance. As an integral part of a company's corporate social responsibility programs, sustainability reporting improves corporate reputation, strengthens consumer confidence, and reduces business risks. Therefore, the main goal of this Special Issue is to highlight the mutual influence of business model innovations and the development of information technologies with their introduction into the life of society. An approach based on the study of the characteristics and peculiarities of subject industries and the development of new information technologies is needed to ensure sustainable development remains justified. Research articles and original reviews are welcome in this Special Issue and topics may include, but are not limited to:

- The information technologies of sustainable development;
- Sustainable business strategies;
- Sustainable practices;
- Corporate governance and sustainability;
- Internal control and sustainability;
- Big data and sustainability;
- Sustainability and corporate innovation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
