

Special Issue

Realising Digital Futures Through Green AI, Cybersecurity and Sustainable Societies

Message from the Guest Editors

AI and cybersecurity are at the core of building sustainable societies. In this context, the proposed Special Issue, "Realising Digital Futures Through Green AI, Cybersecurity and Sustainable Societies", examines the intersection of artificial intelligence (AI), cybersecurity, and inclusive digital sustainability to foster resilient, equitable, and livable communities. This Special Issue will focus on the following: (a) Investigating emerging cybersecurity risks in critical infrastructure and smart cities;

(b) Assessing AI's dual role in both mitigating and exacerbating online harm, particularly in vulnerable communities;

(c) Addressing digital inclusion challenges affecting culturally and linguistically diverse (CALD) populations, refugees, and Indigenous groups;

(d) Perspectives of green AI in creating livable communities and fairer societies. This collection will contribute to the existing literature on digital resilience and green and ethical AI by integrating multidisciplinary perspectives from cybersecurity, behavioural sciences, and environmental sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
