

## Special Issue

# Food Choice and Environmental Concerns

### Message from the Guest Editors

We invite you to publish your findings in a Special Issue of *Sustainability* covering recent studies related to Food Choice and Environmental Concerns. It provides an opportunity to promote your work and research outcomes in nutrition, food behaviors, environmental sustainability, health, and food safety fields, with the aim of tackling the consequences of imbalanced diets on environment and health status, starting with the food choices we make. Sustainability covers environmental, social, and economic dimensions, and requires an interdisciplinary approach in order to explore and emphasize issues and advanced data in these areas. Papers selected for this Special Issue will be subject to a rigorous peer-review procedure with the aim of the rapid dissemination of research results, developments, and applications. It provides an opportunity to engage and relate to other research works and recent findings. The purpose of this Special Issue is to tackle new data on food choices and behaviors in relation with ethno-social-economic-environmental influences upon consumers and management aspects.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
