

Special Issue

Sustainable Corporate Governance and Urban Economic Resilience

Message from the Guest Editors

Corporate governance has evolved into a fundamental determinant of economic resilience, particularly within the context of urban economies that are increasingly exposed to financial, environmental, and socio-political disruptions. As global cities face challenges such as rapid urbanization, climate change, and economic volatility, the integration of sustainability principles within corporate governance frameworks has become paramount for ensuring long-term urban economic stability. This Special Issue will investigate the interplay between corporate governance and urban economic resilience, examining how governance mechanisms, regulatory frameworks, and business strategies contribute to fostering robust, adaptable, and sustainable urban economic systems. This Special Issue will enhance the existing body of literature by providing new empirical evidence and theoretical frameworks that underscore the importance of corporate governance in sustaining urban economies. Contributions from diverse academic disciplines and methodological approaches, ranging from qualitative case studies to econometric analyses, are encouraged to ensure a holistic understanding of the subject matter.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
