

Special Issue

Sustainability by Design: Strategies and Solutions for Organizational Innovation

Message from the Guest Editors

Sustainability by design aims to embed sustainability into an organization's current activities to drive added value creation, as well as achieve a sustainable impact. This Special Issue aims to highlight contributions that promote sustainability by design. Research areas may include (but are not limited to) the following: Innovative solutions that incorporate sustainability in supply, production, and distribution processes in industry and services.

The development of ecological software and engineering that contribute to the sectoral objectives of reducing greenhouse emissions.

Green cloud solutions that support organizations in making sustainability-based decisions for cloud migration.

Economic sustainability, which defines appropriate cost levels and structures through green software practices and the use of renewable energy that aims to save costs and promotes sustainability.

Fulfilling sustainability promises by integrating sustainability into corporate strategies and unlocking shared value for both the organization and society. Sustainability learning at scale and speed that embeds a sustainability mindset throughout the company.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
