

Special Issue

Sustainable Food Processing and Chemical Analysis

Message from the Guest Editors

This Special Issue focuses on innovative solutions and scientific advancements in sustainable food processing and chemical analysis, with the goal of reducing environmental impact while ensuring food safety, quality, and nutritional value. The Special Issue covers a wide range of topics, from green technologies in food production to advancements in chemical analysis methods that enable more precise quality control. Submissions that address interdisciplinary approaches, combine sustainability with technological development, and propose novel practices in the food industry are highly encouraged. **Objectives:**

- To present innovative methods and technologies in sustainable food processing that minimize resource use and reduce waste.
- To highlight cutting-edge chemical analysis techniques that ensure food safety, quality, and compliance with sustainability standards.
- To explore the role of green technologies in enhancing the nutritional value of food products and improving energy efficiency in production processes.
- To foster collaboration between researchers and industry stakeholders in adopting eco-friendly food production and packaging practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
