

Special Issue

Marine Litter Distribution, Data Collection and Data Harmonization in the Mediterranean Sea

Message from the Guest Editors

We have been invited to edit a Special Issue on "*Marine Litter Distribution, Data Collection and Data Harmonization in the Mediterranean Sea*" in the journal *Sustainability*, a cross-disciplinary open access online journal published by MDPI (5-Year Impact Factor: 3.251). This Special Issue aims to collect information about the distribution of marine litter in the coasts and the sea around the Mediterranean Sea, with an emphasis in Greece. Additionally, papers discussing data availability and data harmonization between different efforts and entities will be accepted, especially if they highlight potential gaps and discrepancies, resulting in actions from different countries and monitoring programs. This Special Issue is designed in the context of the EVALuating MARine Litter in Greece, "EVMAR" Project. Due to your extensive experience and knowledge in this field, we would like to invite you to submit a feature paper related to the selected topic. If you are interested in contributing a paper, please let us know at some time before 31 July 2023.

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
