

Special Issue

Energy Transition in Agriculture and Forestry Systems: Policies, Technologies and Sustainability Challenges

Message from the Guest Editors

This Special Issue will explore the role of the energy transition in agriculture and forestry, addressing key political, technological and environmental challenges and providing a multidisciplinary perspective on sustainable energy solutions, innovative technologies and policy and regulatory frameworks driving decarbonization and resilience in agricultural and forestry systems. Contributions will focus on the integration of renewable energy in agriculture and forestry, the development of bio- and agroenergy, climate change mitigation strategies and the socioeconomic, political and legal implications of the energy transition in these sectors. Special attention will be given to technologies that enable the real integration of the agricultural, food and forestry industries and energy production in order to achieve energy independence for farms. This Special Issue seeks to promote discussion on best practices and the regulatory approaches and technological advances necessary to support a sustainable and efficient transition in this sector and achieve the objectives of the UN 2030 Agenda and the European Green Deal.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
