

Special Issue

Sustainable Transformation on Digital Innovation and Strategic Management

Message from the Guest Editors

This Special Issue focuses on how digital technologies—such as AI, IoT, and blockchain—can drive sustainable innovation while reshaping business strategies for long-term environmental, social, and economic value. Its scope includes theoretical, empirical, and case-based research that addresses the development, implementation, and impact of digital innovations aligned with sustainability goals. The purpose of this issue is to bridge gaps in the current literature by offering integrated insights into how digital innovation can be strategically managed to advance sustainability. While existing research often treats digital transformation and sustainability as separate domains, this issue positions them as interdependent forces shaping future competitiveness and resilience. It contributes to sustainability by addressing tools, metrics, policies, and governance mechanisms necessary for measuring and guiding sustainable digital practices. Ultimately, this issue will provide actionable frameworks and multidisciplinary perspectives to support researchers, practitioners, and policymakers in driving sustainable development through digital innovation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
