

Special Issue

Sustainable Early Childhood Education for the Sustainable Development of a Post-pandemic World

Message from the Guest Editors

The Covid-19 pandemic has presented an opportunity to rethink the importance of early childhood education (ECE) and its contribution to the world's sustainable development. As the pandemic is coming to an end, a pressing question has emerged: whether and how to implement a sustainable ECE policy to promote sustainable development in the post-pandemic world. This Special Issue welcomes contributions from various disciplines or with various methodologies, such as national surveys, policy studies, case studies, and program evaluation studies; evidence-informed reviews and opinion pieces; or other suggestions of your choice. The research areas may include (but are not limited to) the following:

- The development and implementation of sustainable ECE policies;
- The implementation of quality assessment, assurance, and improvement programs at international, national, regional, and local levels;
- The sustainable development and supply of professional teachers;
- The sustainable development of young children in diverse contexts;
- Parent and family functioning for children's sustainable development;
- The sustainable growth of early childhood industries in different societies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
