Towards Sustainability: Advanced Research on Environmental Analysis and Air Pollution

Message from the Guest Editors

Recently, the pressing challenges posed by environmental degradation and air pollution have become increasingly evident. The scientific community recognized the detrimental effects of air pollutants on both the environment and human health, making it imperative to delve deeper into an understanding of these issues and to develop sustainable solutions.

Environmental analysis plays a pivotal role in helping us to identify the sources of pollution, to monitor environmental changes, and to evaluate the effectiveness of mitigation measures. From industrial emissions and vehicular exhausts to agricultural and urban development, the sources of air pollutants are diverse and widespread.

Against this backdrop, fostering interdisciplinary collaboration, researchers can advance our understanding of environmental dynamics and develop strategies to mitigate pollution effectively. We aim to showcase the latest advancements, highlight innovative approaches to environmental analysis, and underscore the importance of collective efforts to tackle air pollution. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
