

Special Issue

Sustainability Assessment of Agricultural Cropping Systems

Message from the Guest Editors

In this Special Issue of *Sustainability*, we would like to provide up-to-date information regarding the most recent and important findings related to sustainability in the cropping system using niche or novel crops such as legumes. We welcome both original research and review articles focused on the current impact of cropping systems involving no tillage on soil, microorganism and plant interactions, and crop yields. Papers regarding introducing new plant species (e.g., herbs and legume plants) in cropping systems to maintain biodiversity in modern agriculture are also welcome as valuable contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
