

## Special Issue

# Sustainability in Forest Ecosystem Services and Biodiversity Conservation

### Message from the Guest Editors

The scope of this Special Issue includes themes such as effect of sustainable forestry on biodiversity conservation, protection of endangered species and wildlife management. Its purpose is to enable researchers to share results of their studies, which would boost interest in forestry management by shedding light on the practices of harvesting woodland resources, such as timber, wildlife, berries, mushrooms and herbs. This is important as such resources do not threaten the existence of a forest's biodiversity (birds, insects and flowering plants), including endangered and key species, game animals, invertebrate fauna, mushrooms and plants. The focus of this Special Issue is also on bioindicators (e.g., woodpeckers, xylophagous beetles, and lichens) of forest environment quality. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
