# Renewable Energy Sources and Sustainability

## Message from the Guest Editor

The role of renewable energy resources is indubitable to meet the global milestone of mitigated carbon and affordable clean energy for an environmentally sustainable world. Recent trends in the rapid production and integration of renewable energy sources such as solar, wind, geothermal, and hydro energy have stimulated the formation of distributed energy systems. Isolated and grid-connected microgrids are burgeoning to avail the propitious opportunities of these energy resources. The sporadic characteristic of renewables is of substantial research interest to the researchers, which are currently addressed by amalgamating single and hybrid energy storage systems. By virtue of cuttingedge power electronics, advanced control systems, and efficient algorithms, smart grids facilitate impeccable energy coordination and demand-side management, ensuring secure and stable grid operation in compliance with grid code and local policy. The integration of renewable energy resources is also thriving in electric vehicles, net-zero buildings, and sustainable manufacturing to alleviate climate change and eradicate carbon footprints.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
